

## RECYCLE POLICY

We at Battery Pro George strive to take care of the environment and practice safe and proper recycling of old used lead acid batteries.

All parts, plastic, metals and acid will be recycled and repurposed.

In South Africa, the recycling process begins with the collection of scrap used batteries. Battery Pro George wants to do its part and we will take any lead acid batteries, not just our brands but any brand of battery for recycling.

IF you have any old used lead acid batteries, just drop it off at Battery Pro George and we will take care of the recycling!!
